

# THE MUSIC THERAPIST'S TOOLBOX: APPLICATIONS AND INTERVENTIONS FOR BOOMWHACKERS, HARP AND GARAGEBAND

This 4 credit CMTE will outline different applications and interventions featuring the tools of boomwhackers, harp and GarageBand used by various music therapists within their practices. The presenters will explain techniques for using these tools and will discuss how they specifically implement them with the populations they serve. The session will end with an open forum in which participants can share other own ideas for interventions and activities.

**PLEASE, BRING AN INTERVENTION OR ACTIVITY TO SHARE FOR THE LAST PORTION OF OUR CMTE!**

## Course Objectives:

Participants will...

- Demonstrate 3 boomwhacker activities that can be used with older adults
- Identify 2 uses of harp in music therapy practice from literature
- Demonstrate 2 simple playing techniques on harp
- Identify 2 ways in which the use of GarageBand is therapeutically appropriate
- Demonstrate 2 ways of composing music for and with music therapy clients using GarageBand
- Demonstrate an intervention used in personal practice and describe its goals and objectives
